SUMMARY

Computer Science graduate with hands-on experience in building full-stack web applications using the **MERN stack** and **RESTful APIs**. Skilled in Data Structures & Algorithms, authentication systems, AWS deployment, and AI-powered application development using LLM APIs.

EDUCATION

Shri Ramswaroop Memorial University
Bachelor of Technology in Computer Science

2022-2026
8.56 CGPA

EXPERIENCE

Cloud Computing Intern – Istop.ai

Nov 2024 – Jan 2025

- Deployed and managed web applications using AWS cloud services .
- Built and deployed a full-stack application using Elastic Beanstalk and LAMP stack.
- Implemented secure authentication using AWS Cognito for user management.

Web Development Intern – TATA Motors, Lucknow

June – July 2025

- Designed and built a responsive Safety Dashboard using HTML, CSS, and Bootstrap.
- Collaborated on integrating frontend components with backend systems for data-driven features.
- Enhanced frontend functionality using JavaScript.
- Optimized frontend rendering and component structure to improve UI responsiveness.

PROJECTS

Acadify – AI-Powered Study Assistant | MERN Stack (React.js, Node.js, Express.js, MongoDB Atlas, Groq LLM API, Tesseract.js) | [Live Demo](#) | [GitHub](#)

- Developed a full-stack **AI-powered learning platform** using the **MERN stack** that generates personalized study roadmaps and contextual YouTube recommendations via **LLM-based prompt engineering (Groq LLM API)**.
- Implemented **OCR-based content extraction pipeline** using **Tesseract.js** and **pdf-parse** to process PDFs/images and enhance **context-aware AI recommendations** with improved accuracy.
- Developed scalable **RESTful APIs** with **MongoDB Atlas & Mongoose**, supporting **chat history management**, **dynamic content retrieval**, and efficient data handling.
- Integrated **secure authentication & authorization** using **JWT/OAuth**, along with **language-based recommendation filtering** and modular backend architecture for improved scalability and performance.

HirableX – AI-Powered Interview Preparation Platform | MERN Stack (React.js, Node.js, Express.js, MongoDB, Google Gemini API, Puppeteer) | [Live Demo](#) | [GitHub](#)

- Built a full-stack AI-driven interview assistant using MERN stack that generates **personalized interview reports (technical/behavioural questions, skill gaps, preparation roadmap)** via **LLM-based analysis (Google Gemini API)**.
- Created an **ATS-optimized resume generator** using **AI-generated HTML** and **Puppeteer-based PDF rendering**, enabling dynamic, downloadable resumes tailored to job descriptions.
- Implemented secure **authentication & authorization** using **JWT**, **HTTP-only cookies**, and **token blacklisting**, ensuring protected routes and session management.
- Developed scalable **RESTful APIs** with **MongoDB Atlas & Mongoose**, integrating **file processing (Multer, pdf-parse)** for **resume parsing and contextual data extraction**.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, TypeScript.
- **Frontend:** React.js, Next.js, HTML, CSS, Tailwind CSS.
- **Backend:** Node.js, Express.js, FastAPI, Django.
- **Databases:** MongoDB, MySQL, PostgreSQL.
- **Cloud & DevOps:** AWS (Elastic Beanstalk, Cognito, EC2, S3), Docker.
- **Tools:** Git, GitHub, Postman, VS Code.
- **AI & LLMs:** OpenAI APIs, LangChain, AI Agents (tool-using, multi-step reasoning), RAG , Groq API, Gemini API.
- **Core CS:** Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks.
